A Word On Surplus Lines: Surplus lines insurance policies are sold by non-admitted carriers through surplus lines brokers, non-admitted does not mean non-regulated. Non-admitted carriers have been writing surplus lines insurance since the 1800's and they have demonstrated to your state their financial stability, reputation and integrity. Non-admitted carriers are fully licensed in your state and must file financial information with your department of insurance and adhere to specific capitalization, investment and solvency standards established under your state insurance code. All of our carriers have been approved and reviewed by your state to sell surplus lines insurance.
